

ColoZen™

COLOSTRUM SUPPLEMENT A cost effective life-saving colostrum supplement for new-born piglets

ColoZen™ is a wholly, New Zealand-developed product. An approved animal remedy (ARB No 7389), it is distributed through Veterinarian Clinics and Animal Healthcare Providers.

ColoZen™ as a colostrum supplement

- **ColoZen™** is a unique formulation of readily available energy, protective immunoglobulins and vitamins.
- The immunoglobulin mixture activates the immune system and protects against infectious diseases.
- The Vitamin B₁₂ supplement prevents wasting, anaemia and lack of co-ordination.
- Vitamin A protects the intestinal mucosa against adhesion and invasion by viruses and pathogenic bacteria.
- The sugars and proteins are readily absorbed and immediately utilised for energy by the piglet.

Instructions for Use

ColoZen™ is a two-pack formulation.

- 1) Immediately before use add the contents of the diluent container to the **ColoZen™** container. Shake vigorously for at least 2 minutes.
- 2) As soon as possible after birth administer one dose (3 ml) of **ColoZen™** to each piglet.
- 3) **ColoZen™** must be administered within 48 hours to be effective.
- 4) For mothered piglets one dose is normally sufficient. For orphan and fostered piglets two or three doses at two hour intervals will be required.
- 5) Best results are achieved by inserting the applicator well into the piglets throat.
- 6) Rinse applicator thoroughly after finishing the days' applications.

Stability and Storage

- In the separate bottles the material is stable for 2 years.
- When mixed the formulation is stable for 2 months in the refrigerator (4-8°C).

Additional information on **ColoZen™** is available from the manufacturer.
